

I recently built out my entertainment room and through the whole ordeal, the hardest task was to choose a pool table and who would install that table for me. I visited Gulf Coast Billiards and they helped me throughout the entire process of selection to the final installation at my home. The process allowed me to distinguish from a quality pool table from a poorly made table and that's when I was introduced to United Billiards. The tables were solid and of superior construction. I thought that the pool table would be delivered completely assembled; however to my surprise, there is a process to install a pool table. My pool table was installed professionally by Gavin Miller at Gulf Coast Billiards. He made sure that my table was installed perfectly with precision to all professional standards to insure that the table rolled true and consistent throughout. Since it was delivered, I truly enjoy my time on the table but more importantly I really appreciated all of the service that Gulf Coast Billiards gave me and the quality of construction from United Billiards that went into building the table. I'm 100% satisfied with my purchase. United Billiards and Gulf Coast Billiards is an A+ Team!
